

To Do List with GUI

Julia Jaromirska

Functions

- adding tasks of different types
 - important
 - to do today
 - other
- deleting task after completing
- editing task

Problems

- choosing appropriate GUI library
- problems with creating GUI objects and making they work properly
- poor knowledge of C++

New things I learned

- making applications with GUI
- wxWidgets library
- expanding knowledge of C++

What could be improved?

- appearance of the application
- edit function support
- adding function of setting deadlines to tasks
- adding database

thanks
